Colleague-POSConnect/AR Split Tender

Setup

Please contact support to setup AR or POSCONNECT Split Tender options.

Web Customer View

The change that you will see on the web is, as a customer, they will shop as normal. When they select the option to go to the cart the first thing they see will be the cart details and asking if they will pay with Financial Aid.

If they select 'No I will NOT use Financial Aid' then they will continue as normal

If they select 'Yes I'd like to use Financial Aid' as seen below.

Store processing of Split Tender

The order will come to the store as a suspended transaction, just like a normal CC transaction. The store personnel will be able to run the pick slip reports (POS.26.10 or 13) and pending order reports the same as they do regular web transactions.

Bring up the suspended transaction the same as other web transactions

Since this will be treated as a POS Connect or FA order, you will get prompted to look up the customer the same as your existing POSCONNECT/FA transaction (POS Connect is used in the example).

The Account ID will be brought in from the transaction where the customer entered it on the web site.

The transaction will load each item and validate the customer has the funds to cover each item that was ordered. If the customer goes over their limit or has purchased something that is not covered by their fund source then a message will display that the SubClass limit has been exceeded or that the limit has been reached. Click on the 'Yes' button to add the item to the cart and to proceed, if you select 'No' then the item will not be added to the cart.
