

ADDING A VENDOR

ADDING A VENDOR

To add or create a new vendor in the system is the same process for General Merchandise and Textbook. If you have the Accounts Payable module then you will also need to create the vendor there and link it to the vendor that you created in GM or TX, keep in mind that GM and TX share the vendor file so if you create it in one then it will be available in the other.

Log to either GM or TX and then select the VM – Vendor Maintenance option

#	STORE	NAME	ACCOUNT NUMBER
??			
??			
??			

- Vendor ID: Enter a period '.' To create a new vendor number or enter 3 or more letters in the vendor's name or sort code to bring up an existing vendor.
- Sort Code: Enter a code that will help you find or reference this vendor. This code is used in cross-references and for sorting in reports.
- Type: Enter the Vendor type. Options here are D=Distributor, M=Manufacturer, P=Publisher, V=Vendor, W=Wholesaler. Publisher and Wholesaler are normally used in Textbook (TX), Manufacture and Vendor are normally used in General Merchandise (GM) and

Distributor is used in both.

- BIP Code: Used is TX and stands for Books In Print Code, Books In Print is not commonly used anymore.
- WBG Code: Used in TX and stands for Wholesale Buying Guide, this indicates what wholesale guide code to associate with this vendor.
- Alt Order Vndr: This is used to indicate if an alternate vendor should be used for this Vendor, this is normally used when one vendor buys another.
- Alt Rtn Vndr: This is used to indicate if an alternate vendor should be used for this Vendor, this is normally used when one vendor buys another.
- Name: The name of the Vendor as it will show on reports and POs and Returns.
- Enter Address, City, State, and other information as it is available.
- Prepaid: Enter a 'Y' here if this vendor must be prepaid.
- SAN #: This is a textbook field and stands for Standard Address Number.
- Last Update: This field is maintained by the system
- Average Ship Days: Enter in the average number of days it takes for shipping.
- Minimum Order Qty: Enter the minimum order quantity that this vendor requires to process/ship an order, this is usually a GM vendor field.
- Minimum Order Amt: Enter the minimum order amount that this vendor requires to process/ship an order, this is usually a GM vendor field.
- Default Ship Code: Enter in the default ship code that will be used when creating a po for this vendor.
- Backorder Code: Enter the default backorder code to use when processing a receiving for this vendor.
- List/Net: Enter either 'L' or 'N' to set the default pricing type to use when creating a PO for this vendor. L=List pricing and N=Net pricing, List pricing usually includes a discount off of the List and Net is direct

price of the item.

- Store/Name/Account Number Enter in the store number and Account Number associated with that store
- EDI/Wantlist/etc. This is used in TX for the electronic wantlisting.
- Comments: Enter a 'Y' and then enter any comments that you would like to have associated with this vendor.

Next you should enter in the additional ordering information and the returns information.

=Update	X=Cancel Entries	M=Modify	A=Additional Ordering	R=Returns
V=View PO's				

Additional Ordering

To enter in the additional ordering information, select the 'A=Additional Ordering'. The information on this page is used with the Accounts Payable (AP) module
