PICK SLIP Inactive-Over Due Rental Notification

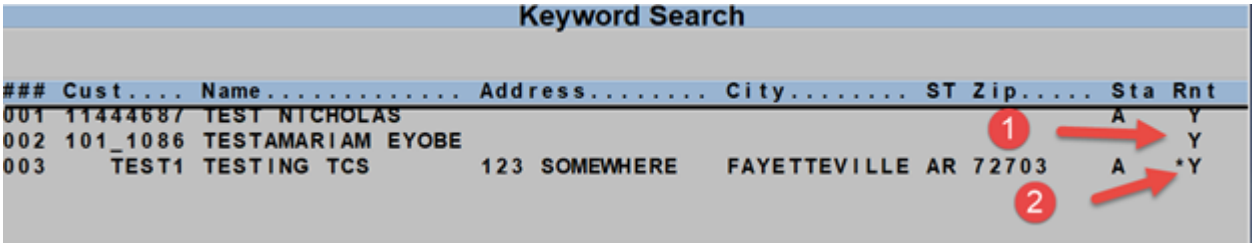
To add notification of Inactive customer or Over Due rentals to a pick slip then you need to add the following line to the MO.PICK header.

Line 1 in the example below shows how to add the notification to the top of the pick slip printing. The attribute can be RPD (Rental Past Due) or PDR (Past Due Rental) and the L#94 fills the entire lines, if you wish then you can also put in a blank line after this for better formatting.

##	NewL?	Indent	Attribute	Mask	Font	Comments
1	1		RPD	L#94	3	RENTAL PAST DUE OR INACTIVE
2	2	4	Cust No.:	L#10		CUST NO.
3	2		47	L#20		

Rental Customer Information Lookup

Rental Customer Information Lookup



When you look up a customer for rental or for rental drop off you will see some additional information on the search display screen.

1. If a customer record has ever had a rental, then a ‘Y’ will appear under the “Rnt” column
2. If the customer currently has a rental that has not yet been returned, then a “*Y” will show, again, this is to indicate that the customer record currently has an outstanding rental
